The miracles of science™

Color retrieval – quick and easy.

ColorNet® is a user-friendly, software platform designed specifically to make color formula retrieval and reporting quick and easy. It utilizes technology to enhance our extensive color expertise and provides features such as Acquire RX™, VINdicator™, cost and VOC tracking, inventory management and a variety of reports.

ColorNet Formula Retrieval System

DuPont customers may choose from an entry-level version of ColorNet, known as Mini ColorNet, or Full ColorNet, which offers additional features such as management, VOC and cost tracking reports and access to OrderNet™.

Full ColorNet includes:

- Car/Code/Year Look-Up
- Formula Number Look-Up
- VINdicator
- Fleet Look-Up
- Cross Reference
- ChromaVision®/Acquire RX
- Special Color Library
- Formula Scan
- Formula Comparison
- Formula Recovery
- Paint and Materials Calculator
- Available Quality Check
- Paint Volume Calculator
- MSDS/Product Data Sheets
- Label Printing
- ColorMix Scale Interface
- Scale Usage Report
- Cost Tracking
- Repair Order Paint & Materials
- VOC Tracking
- Customer Address Book
- Inventory Reports
- OrderNet
- Mixing Color Management
- Mixing Color Labels
- Mixed Color Management

Color matching – quick and easy.

DuPont customers with ColorNet® can utilize exclusive color measurement, selection and mixing tools that are designed to work together flawlessly. From a portable color measuring system to a computerized paint pouring system, DuPont ColorNet helps make the most accurate color matches.

VINdicator™ Formula Selection Technology

The first and only system that correctly identifies a vehicle's color based on its vehicle identification number (VIN), removing variability from the entire process. In less than a minute, you can find a reliable match. This color-retrieval solution helps DuPont Performance Coatings customers easily and efficiently select the right ChromaSystem™ base-coat formulations. Bottom line: it's a simple alternative to older and confusing formula-retrieval tools.

Acquire RX™ Color Measuring Instrument

Acquire RX is a portable, hand-held color measurement instrument that is used directly on a vehicle or part to obtain the correct color match, then transmits that reading into the ColorNet formula retrieval system. ColorNet retrieves and adjusts the formula to an accurate match in the color quality you need. Acquire RX is easy to use, reliable and productive, so you can achieve an accurate match the first time, every time.

X-Pert™ Paint Mixing System

X-Pert is the industry's first computerized paint mixing system, which allows you to mix color formulas accurately and productively, time after time. It helps eliminate costly overpours, reduces paint waste and saves time and money by being correct the first time, every time.

The X-Pert system works with ColorNet and consists of a hydraulically operated dispensing unit and specially designed mixing lids. The system connects to the ColorMix scale.

Color support – quick and easy.

ColorNet® Support

DuPont provides a dedicated, toll-free number, 1-800-634-2614, to answer customer inquiries, provide technical support and schedule training for the ColorNet color formula retrieval system.

This support line is staffed 7:30 a.m. – 5:45 p.m. CST by experienced computer professionals.
